# Chrona Blockchain

Chrona

Technical Description

Source blokchain

Amplifier blockchain
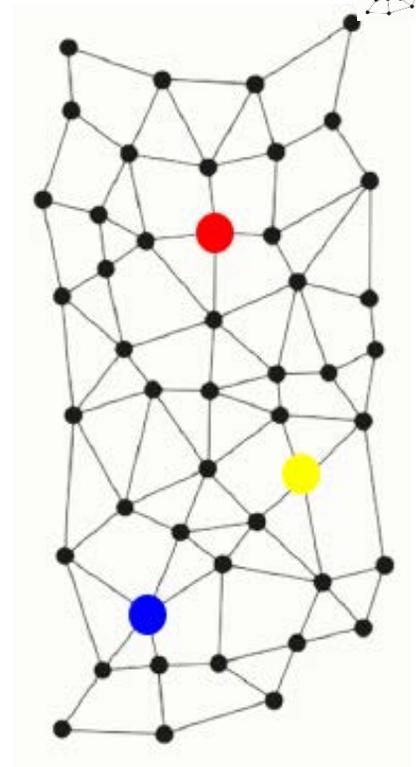

Parity deeplearning blockchain

Technical description
Attempts to make a technical approach that complements the shortcomings of the block chain ....

Focus on technical improvements and practical use of social resources that are problematic in practical implementation

Fast processing
stability
Maintain Block Chain Original
Implement realistic block chain technology

$$B = CA^1 \ \& \ A^\&$$

Chrona SWAP

Blockchain are various.A number of enthusiasts already proposed using this technology in various sectors and contexts, including : Government to record in a transparent way citizens' votes, or politicians' programs (for verifying if promises made have been kept) or to enable autonomous governance systems [36] ; Intellectual property to certify the proof of existence and authorship of a document ; Internet to reduce censorships, by exploiting the immutability of data stored in the blockchain ; Finance to transfer money between parties without having to rely on banks ; Commerce to record goods' characteristics as well as their ownership, especially for luxury goods, thus reducing the market of counterfeit/stolen items ; Internet of Things (IoT) by exploiting smart contracts to automatically process data coming from sensors, in order to let intelligent machines interact with each other [and autonomously take actions when specific situations occur ; Education   to store information on qualifications acquired by learners, e.g., to reduce job application frauds; in this context, multiple actors (e.g., universities, training institutions, etc.) could write qualifications achieved by a person on the blockchain ; human resources staff could then easily obtain information about when and where a given competency was obtained.
 A rather comprehensive overview of applications developed in each of the above sectors can be found in / IEEE Access2017, 4, 2292 – 2303

The Chrona block chain makes up a block chain that meets all these and the reasons for the paradigm of technology.
